PROFESSIONAL SUMMARY

Motivated and detail-oriented web developer with hands-on experience building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in creating responsive, user-focused interfaces with React.js, Tailwind CSS, and Bootstrap. Proven ability to deliver live, deployed projects and collaborate in professional development environments. Strong problem-solver with a passion for clean code and continuous learning.

WORK EXPERIENCE

Front-End Intern | *Enigmatix* | December 2024 – April 2025

- Built front-end UI components using React.js, Bootstrap, and Tailwind CSS as part of real-world development workflows.
- Attended technical sessions with senior developers, learning industry best practices and coding standards.

EDUCATION

Bachelor of Science in Computer Science

Islamia University Bahawalpur

TECHNICAL SKILLS

Front-End: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS

Back-End: Node.js, Express.js

Databases: MongoDB, SQL

Tools & Platforms: Git, GitHub, Vercel, VS Code

Soft Skills: Problem-Solving, Communication, Team Collaboration, Time Management

PROJECTS

Personal Developer Portfolio | [Live: wahabkhan0225.vercel.app](https://wahabkhan0225.vercel.app)

- Created a fully responsive personal portfolio website to showcase projects, skills, and professional background as a MERN stack developer.
- Built using React.js and Tailwind CSS with smooth navigation, project showcase sections, and contact form integration.
- Deployed on Vercel with custom routing, ensuring fast load times and mobile-first responsiveness across all devices.

Masooma – UX/UI & Brand Designer Portfolio | [Live: masooma-portfolio.vercel.app](https://masooma-portfolio.vercel.app)

- Engineered a professional portfolio website for a UX/UI and brand designer, translating design requirements into a pixel-perfect, responsive React.js application.
- Integrated smooth animations, dynamic project showcasing, and an intuitive layout using Tailwind CSS to reflect the client's brand identity.
- Deployed on Vercel with optimized performance, ensuring fast rendering and seamless user experience across desktop and mobile.

The Best Group of Colleges – Full-Stack Web Application (Final Year Project) | [Live: the-best-group-of-colleges.vercel.app](https://the-best-group-of-colleges.vercel.app)

- Engineered a large-scale full-stack web application as a Final Year Project using the MERN stack (MongoDB, Express.js, React.js, Node.js) featuring a public-facing site and three separate portals: Student, Faculty, and Admin.
- Integrated a Learning Management System (LMS) and Content Management System (CMS), allowing admins and faculty to manage courses, content, and student data dynamically.
- Implemented JWT-based authentication and role-based access control to secure all three portals and restrict features based on user roles.
- Integrated Cloudinary for scalable cloud storage of large files including documents, images, and media uploads across the platform.
- Deployed on Vercel with optimized performance, semantic HTML structure, and a fully responsive UI using Tailwind CSS.

Library Management System – Back-End Project | [GitHub: github.com/WahabKhan7528/librarysystem](https://github.com/WahabKhan7528/librarysystem)

- Built a back-end library management system using Node.js, Express.js, and MongoDB to handle books, members, and borrowing records with full CRUD operations via REST API.
- Structured RESTful API endpoints for searching, adding, updating, and deleting records, following standard back-end architecture practices.
